CALPUFF View[™] Release Notes

CALPUFF View™ Version 11.0

Release Notes

June 10, 2024

New Features

opic	Feature Description
CALPUFF	Model Executables Included with Application Installation
	Lakes Environmental Software acquired the CALPUFF modeling system from Exponent in May 2024. As a result of the acquisition, modeling system executable are now directly installed with CALPUFF View. The application will work seamlessly for all existing CALPUFF View users. Ne users will find model executables and associated files in the application director (C:\Program Files (x86)\Lakes\CALPUFF View\). The Models Check utility (found in the Tools menu) is still available for users to verify their installation.

CALPUFF View™ Release Notes

Known Issues

Topic	Issue Description
CALPOST	Background Data Files Not Accepted in EPA-Approved Version
	A bug in the model code prevents the USEPA-Approved CALPOST model (Version 6.221, Level 080724) from reading hourly background data files (BACK.DAT). Code modification is necessary for the process to work correctly.
CALPUFF	Buoyant Line Source with Variable Emission Factors Not Recognized
	A bug in the CALPUFF model version 7.2.1 prevents the model from properly recognizing buoyant line source IDs when variable emission factors are included. The issue is addressed in CALPUFF 7.3.2.
CALPUFF	Sub-Hourly External Source Files with Different Time Steps
	CALPUFF model version 7.2.1 is unable to process external source files with different sub-hourly time steps.
