WRPLOT View™ Version 7.0.0

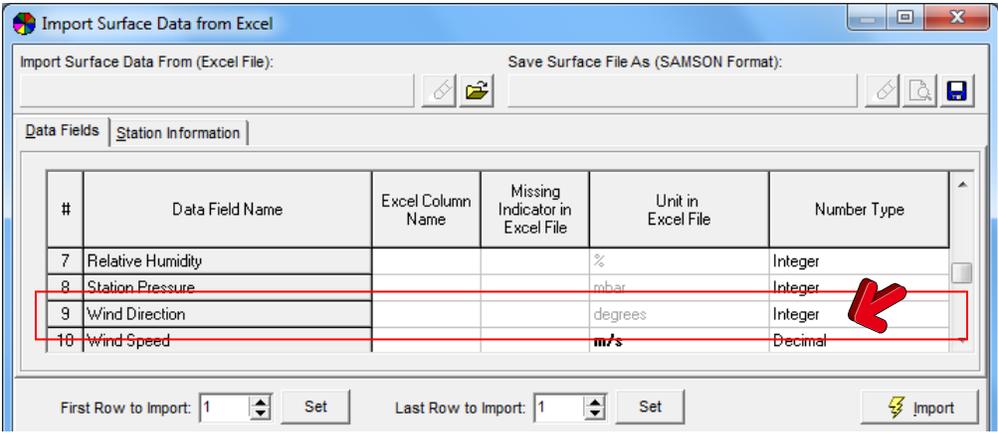

Release Notes

June 3, 2011

New Features

Topic	Feature Description
<p>WRPLOT View</p>	<p>Export Wind Rose to Google Earth</p> <p>Now you can export the wind rose from WRPLOT View into Google Earth by pressing the Export button available under the Wind Rose tab.</p>  <p>The screenshot shows the WRPLOT View application window. The 'Wind Rose' tab is selected in the bottom navigation bar. The main display area shows a wind rose plot for Station #14826 - FLINT/BISHOP ARPT, MI, with data from 01/01/1988 to 31/12/1988. The plot shows wind frequency by direction and speed, with concentric dashed lines representing percentages (3%, 6%, 9%, 12%, 15%). The 'Export...' button in the right-hand toolbar is highlighted with a red arrow.</p>

Topic	Feature Description																																
																																	
<p>WRPLOT View</p>	<p>Stability Class G Displayed for ISC Type Met Files</p> <p>WRPLOT View Version 6.7.1 and below combined stability class G and F under one stability class (F). For this release, stability class G is being displayed separately under wind roses, graphs, and frequency tables.</p>  <table border="1"> <caption>Wind Class Frequency Distribution</caption> <thead> <tr> <th>Wind Class (Knots)</th> <th>Frequency (%)</th> </tr> </thead> <tbody> <tr><td>Calms</td><td>1.2</td></tr> <tr><td>1 - 4</td><td>10.5</td></tr> <tr><td>4 - 7</td><td>16.9</td></tr> <tr><td>7 - 11</td><td>42.0</td></tr> <tr><td>11 - 17</td><td>25.7</td></tr> <tr><td>17 - 21</td><td>3.1</td></tr> <tr><td>>= 22</td><td>0.5</td></tr> </tbody> </table> <table border="1"> <caption>Stability Class Frequency Distribution</caption> <thead> <tr> <th>Stability Class</th> <th>Frequency (%)</th> </tr> </thead> <tbody> <tr><td>A</td><td>0.2</td></tr> <tr><td>B</td><td>3.1</td></tr> <tr><td>C</td><td>9.7</td></tr> <tr><td>D</td><td>59.4</td></tr> <tr><td>E</td><td>14.7</td></tr> <tr><td>F</td><td>10.3</td></tr> <tr><td>G</td><td>1.4</td></tr> </tbody> </table>	Wind Class (Knots)	Frequency (%)	Calms	1.2	1 - 4	10.5	4 - 7	16.9	7 - 11	42.0	11 - 17	25.7	17 - 21	3.1	>= 22	0.5	Stability Class	Frequency (%)	A	0.2	B	3.1	C	9.7	D	59.4	E	14.7	F	10.3	G	1.4

E	14.7																																
F	10.3																																
G	1.4																																

Topic	Feature Description
Utilities	<p>Import Surface Data from Excel Utility</p> <p>Wind direction values were expected to be given always as integers in the Excel file in order to be correctly imported into the SAMSON format.</p> <p>With this released version, if any wind direction value within the Excel file is given as a floating value, the value will be automatically rounded and converted into an integer value when conversion to SAMSON format is performed.</p>

WRPLOT View™ Version 6.5.1

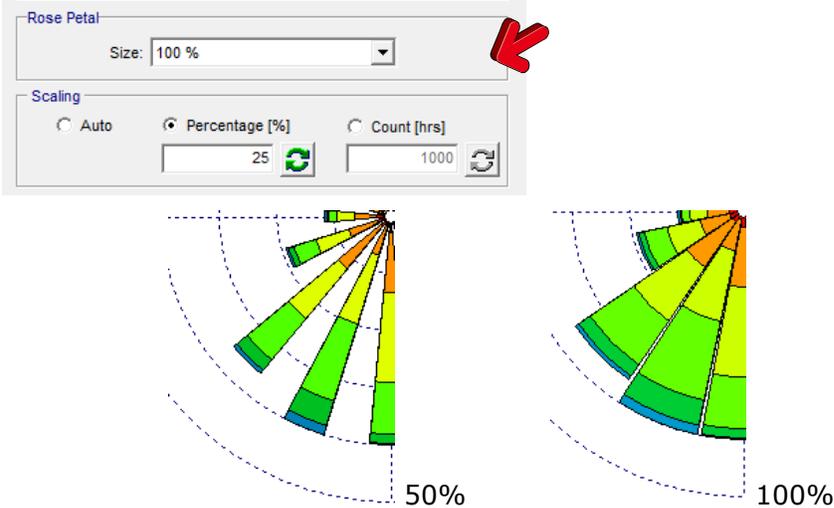

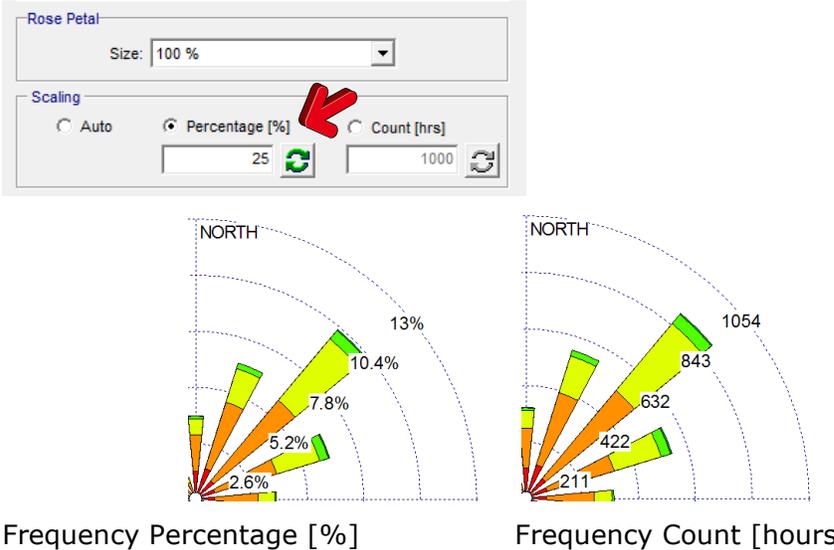

Release Notes

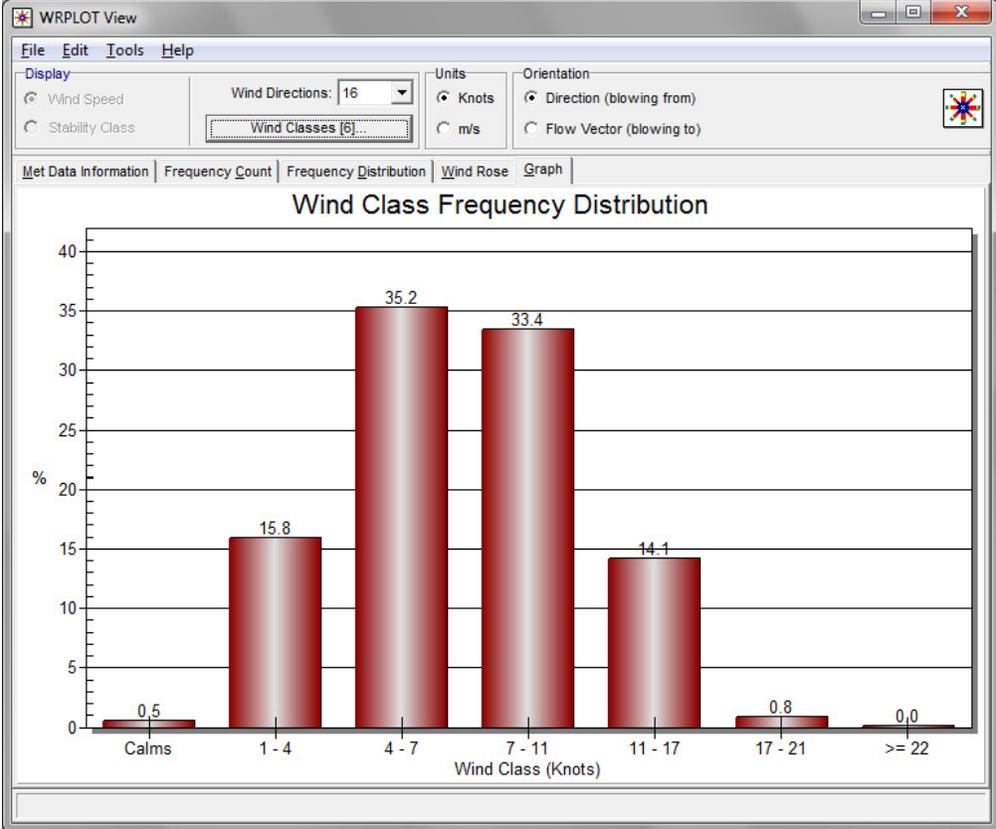

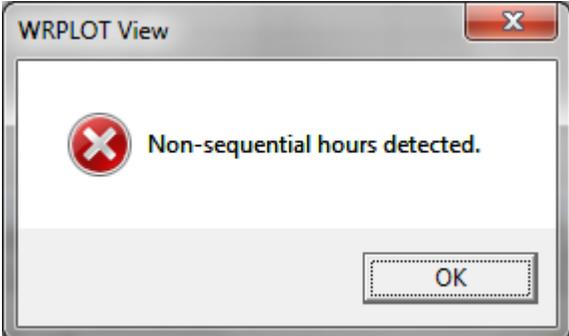

May 19, 2010

New Features

Topic	Feature Description
Installation	<p>Installation Directory</p> <p>The default installation directory for WRPLOT View has changed. Previous versions were installed in "C:\Lakes\WRPLOTView"</p> <p>WRPLOT View Version 6.5 is installed in "C:\Program Files\Lakes\WRPLOT View"</p> <p>During installation, you will be prompted to provide the installation directory of the previously installed version of WRPLOT View in order to preserve your previous global settings.</p> 

Topic	Feature Description
<p>Met File Format</p>	<p>Support for CALMET/CALPUFF Generic Format</p> <p>WRPLOT View now supports the CALMET/CALPUFF Generic surface file format. The CALPUFF Generic format is a comma separated file format and is designed to be used with Version 6 of the CALPUFF modeling system.</p> <p>A sample file for the Generic format (Generic.csv) is available under the folder you chose to install the tutorial files:</p> <p>...\\Lakes\\WRPLOT View\\Wrplot_Samples</p> 
<p>Met File Format</p>	<p>Files with Multiple Records per Hour</p> <p>When a file containing multiple records per hour is specified, both the total number of hours and the total number of records is specified.</p> 

Topic	Feature Description
<p>Graphical Options</p>	<p>User Defined Petal Size and Scaling for Wind Roses</p> <p>WRPLOT View now allows the user to specify the scale over which the wind rose is displayed as well as the thickness of the wind rose petals.</p> <p>These options are available under the Wind Rose Options dialog which can be accessed by pressing the  button.</p> <p>Rose Petal Size: This parameter specifies the percentage width of the wind rose petal. The range of values is from 50% to 100%.</p> <div data-bbox="418 632 1252 1140">  </div> <p>Scaling Option</p> <p>The Scaling option refers to the scaling display for the wind rose rings (circles). Five rings are displayed for the wind rose with an equal increment value. The user can control the frequency percentage value [%] or frequency count value [hrs] for the outer ring.</p> <div data-bbox="418 1350 1252 1900">  </div>

Topic	Feature Description
<p>Graphical Options</p>	<p>New 3D Look for the Bar Graph</p> <p>The Visual presentation of the Wind Class Frequency Distribution has been updated.</p> 
<p>Import from Excel</p>	<p>Non-Sequential Hour Check</p> <p>The Import Surface Data from Excel tool now checks for non-sequential hours in the Excel file to be imported, and warns the user.</p> 

Resolved Issues

Topic	Issue Description
General	Cursor Information The cursor information pop-up was always displaying "export". Correct information is now displayed.
General	Files with Multiple Records per Hour WRPLOT View now provides correct totals of records for files that have multiple records per hour.
General	Rain Rose Tab When Precipitation Intensity is selected from the Tools Menu, the Rain Rose tab is now correctly labeled.
Met File Format	CARB format CARB files with a four digit year are now accepted by WRPLOT View.
Print Options	User-Defined Scale The user defined scale option in the print dialog has been removed as it does not apply to WRPLOT View.
Graphical Options	Brush Selection In the Wind Rose Options dialog, the brush selection for the petals was disabled.
